Hassan Saad
Software Developer

WORK EXPERIENCE

Web Developers (Full-Stack, Remotely, Full-time). DEC 2022 - Present
Software Design Consulting Group *(Beirut, Lebanon)*
- Full stack developer in the Dolphin website (using ASP & Angular JS)
- Create external integrations with multiple worldwide software with Dolphin software.

Head of Developers (Full-Stack, Remotely, Part-time). MAY 2020 - Present
Catalosite (Helpdose) *(Amsterdam, the Netherlands)*
- Designing & developing the user-friendly Website builder from scratch (using Laravel)
- Lead a team of 2 junior developers to create an internal CRM system
- Worked with the AWS team to migrate our domain from GoDaddy to AWS, and in integrating APIs into our website
- Collaborating with the team through agile, and through using Slack channels
- Working closely with the CEO to improve and implement new features on the website
- Establishing an interactive and dynamic website guarantees high traffic, protection from attacks, page views, and maximum user experience

Software Developer (Freelancer). JAN 2015 - Present
- Developed 5+ user-friendly windows software from scratch (using C#, Entity Framework, SQL, MySQL, Dev-Express & Syncfusion)
- Created a full accounting and stock management system which was sold to 20+ clients
- Designing & developing user-friendly Websites from scratch (PHP, Laravel, Livewire, Vue-JS, HTML5, CSS3, Bootstrap, JQUERY, and WordPress)
- Maintaining a vehicle website for a German company, developed in PHP

Head of IT & Developers. OCT 2020 – OCT 2022
Golden Falcon Company *(Kinshasa, Congo Democratic Republic)*
- Developed and established 8+ user-friendly windows software from scratch for 80+ employees in different departments (C#, EF 6, Dev-Express, MS-SQL)
- Connected garage scanner and fuel machine to a system developed by me, where vehicle information is tracked in details, which helped in better vehicle tracking
- Modified & optimized existing software to correct errors, adapt to new hardware and improve performance, which increased the speed to 90% more
- Working directly with the CEO of the company to enhance the existing work process through the developed systems
- Improved the efficiency of the accountants' work by creating well-designed reports from the database, where their work is done 70% less time.

IT Administrator. MAR 2016 – MAR 2017 & JAN 2019 – SEP 2020
Murex Investment & Development Sal *(Beirut, Lebanon)*
- Designed database reports using Fast-Report
- Developed 2 windows software (C# + MySQL)
- Worked with accountants in Data entry & bank Reconciliation
